

**My EHR charting used to
add an hour to my workday.
Not anymore.**

Leverage Your EHR's Ability to Import Patient Notes to Speed Up Your Workflow.

Studies show that charting via an EHR can add almost an additional hour to a physician's workday. With MDS of Kansas, LLC, physicians generate patient notes using dictation and transcription, and completed notes are sent automatically into your EHR.

At MDS of Kansas, LLC, we're experts at interfacing into EHRs like eClinicalWorks, Allscripts, Practice Partner, Cerner, and many others -- and we work directly with your EHR vendor to set up the workflow. In many cases the interface can be implemented in a matter of days.

Spend more time interacting with your patients and less time with your computer. Visit us at www.mdsokansas.com or call us today!
